PROFESSIONAL SUMMARY

Computer Science Engineering student and technology entrepreneur specializing in **AI/ML, Computer Vision, Full-Stack Development, WebAR/WebXR and 3D technologies**. Founder and team lead of **TECHVIMAN**, building AI-powered products, SaaS solutions and immersive digital experiences. Experienced in taking products from **idea → prototype → deployment**.

EXPERIENCE

Founder & Team Lead

2025 – Present

TECHVIMAN | Bihar, India

- Founded and lead TECHVIMAN, a technology startup focused on AI solutions, SaaS products, AI agents, digital products and immersive technologies.
- Lead a multidisciplinary technology team across software engineering, AI/ML, product development, design, marketing and business development.
- Drive product architecture, technical strategy, development, deployment, experimentation and product iteration.
- Developed an AR-based restaurant menu platform combining 3D food visualization, Web technologies and augmented reality.
- Work across product development, customer demonstrations, technical prototyping and startup operations.

SELECTED PROJECTS

AR Restaurant Menu

2025 – Present

WebAR / WebXR / 3D

- Built an interactive restaurant menu enabling customers to visualize food items as 3D objects in augmented reality.
- Implemented food categories, 3D visualization, zoom controls, pricing, ingredients, calorie information and product details.
- Explored WebXR, ARCore, Three.js, GLB, USDZ/Quick Look, photogrammetry and Gaussian-splatting workflows.
- **Live Demo** | **GitHub**

AI Background Remover

2025 – Present

Computer Vision / AI

- Developed an AI-powered image processing application for automatic background removal.
- Built workflows for image upload, segmentation, background removal and customized output generation.
- Designed the project for potential SaaS and API-based applications for developers and digital businesses.
- **GitHub Repository**

Federated Malware Detection Framework

2026 – Present

Federated Learning / Cybersecurity

- Designing a privacy-preserving malware detection framework based on Federated Learning.
- Exploring distributed model training without directly centralizing raw security datasets.
- Investigating machine-learning pipelines for malware classification and distributed threat detection.

Traffic Sign Detection

Computer Vision

- Developed a CNN-based traffic-sign recognition system using Python, OpenCV and TensorFlow/Keras.

Fake News Detection

Machine Learning / NLP

- Developed a supervised machine-learning system for text classification and fake-news

STARTUP BIHAR

INR 10 Lakh

Startup funding received for **TECHVIMAN**.
Selected under the Startup Bihar ecosystem in 2026.

CORE SKILLS

Programming
Python, C, C++, JavaScript

AI / ML
Machine Learning, Deep Learning, Computer Vision, NLP, TensorFlow, Keras, PyTorch, Scikit-learn

Web
HTML5, CSS3, JavaScript, React.js, Next.js, Three.js

Backend
Flask, FastAPI, Django, REST APIs

Data
NumPy, Pandas, Matplotlib, Seaborn, SQL

AR / 3D
WebXR, ARCore, Three.js, GLB, USDZ, Photogrammetry, 3D Reconstruction, Gaussian Splatting

Tools
Git, GitHub, VS Code, Jupyter, Postman

Cloud
Vercel, AWS, Render, Railway, Docker

ACHIEVEMENTS

- **INR 10 lakh Startup Bihar funding** for TECHVIMAN.
- Founder and team lead of **TECHVIMAN**.
- Developed a commercial **AR restaurant menu** solution.
- Experience building AI, computer vision and full-stack applications.
- Participated in technology hackathons and innovation challenges.

CERTIFICATIONS

Introduction to Data Science
Cisco Networking Academy

Data Analytics Essentials
Cisco Networking Academy

detection.

EDUCATION

B.Tech – Computer Science and Engineering

Government Engineering College Jamui 2024 – 2028

Jamui, Bihar, India

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning, Statistics and Web Technologies.

COURSEWORK

Data Structures
Algorithms
DBMS
Operating Systems
Computer Networks
Machine Learning
Artificial Intelligence
Statistics
Web Technologies

INTERESTS

AI Agents | Generative AI
Computer Vision
WebAR / WebXR
3D Technologies
Cybersecurity
Federated Learning
SaaS
Product Engineering
Startup Innovation
